## Our Consulting Philosophy

We don't take your watch and tell you what time it is. We show you how to get more from your watch. We help you consider not only what time it is for you, but also what time it is for your staff, your partners, and most importantly your customers.

Dr. Anderson has served as a consultant to companies in many industries with particular focus on the laboratory reagents and diagnostics markets. Dr. Anderson concentrates on the executive team, customer demand, industry relationship development, fund-raising, investor management and developing collaborations or acquisitions. He also works with companies to develop business plans, raise funds, and find strategic partners.

Recent clients include Aline LLC in Redondo Beach, CA., a rapid prototyping and microfluidics production company, BioCarta/Orbigen in San Diego, CA., a manufacturer and distributor of immunological laboratory reagents, and Immunochemistry Technologies Bloomington, MN, a manufacturer of highly selective detection and diagnostic component kits.
